

Public Relations ASC Report March 4, 2012

Good afternoon everyone. I haven't really done anything this month. I need to make you aware that I have some medical issues going at present. I will need to have one more operation and my blood sugar has gone wacko. Realistically it will probably be toward the end of April or even May before I can carry out my plans. If anyone has a problem with this I will be willing to step down and let someone else take over.

This is what we need to do regardless of whether I remain the chair or not. At present I am working on an email list to different facilities around each town that our groups are located. Once this list is completed it should never have to be done again....just updated. This I can do in front of my computer. What I can't do is visit all of the groups and I didn't attend the last RSC as it was too far for me to travel. The groups need to do a poster day as this will help suffering addicts find their way to our meetings and help us grow. There are still a lot of people who have never heard of Narcotics Anonymous.

ILS,

Bob T.
