

## **Webservant Report NASCONA September 8, 2013**

Our web site is doing great as usual. We are still getting a good traffic count of people visiting our site. If you do a Google search for Texas Narcotics Anonymous NASCONA is in the first 3 pages and the 2 groups that have images on the first page of images.

If your group wants to put a function on our website you just need to email or give me the flier and it will be posted. Someone hacked our website and tried to install an adware program. I have to laugh about it as it didn't work. There was no damage done and I took care of the problem. The only email that was compromised was the [webdude@nascona.org](mailto:webdude@nascona.org) as I never put any of our personal email addresses on line for this reason.

If we don't get any more articles for the newsletter I am going to remove the page and stop doing the newsletter. The coop that I used to use for newsletters has died so it is hard to get articles. I only have one article at present. If anyone wants to take it over I would help if asked.

I do have a question and this doesn't pertain to the website or newsletter. Has our area ever sent in an updated Area Registration? If not maybe we need to assign this task to a trusted servant.

ILS,

Bob T.
