

## Web Servant Report – NASCONA – March 6, 2016

Everything is going great with our website. We are getting a fair amount of traffic on the site and this will increase as the summer approaches due to members traveling. Therefore, it is really important that all of the groups keep you're your meetings up to date at NAWS, our meeting schedule, and web site.

I have been fighting a virus in my computer for over a week now and will have to take it to the shop Monday. Therefore, I will not be doing much work on it for a while. My hope is that my files can be saved. If not it will take me a while to re-enter all of my files. Don't worry about the web site as it is no infected nor is my email. I use the server for all of my business including NA.

ILS,

Bob T.
